Reference: Animal Testing Policy Statement

To All Buyers of Reaxis Chemicals:

Reaxis is a cruelty free company. We do not conduct or commission animal testing of any raw material we use or finished product we produce, either directly or indirectly. However, at any time in the future, we may be required by law as some regulatory authorities still conduct or require animal testing to demonstrate safety. So far that has not been necessary.

None of the products we use in manufacturing are animal derived.

Sincerely,

Marco R. van der Poel
President and CEO
