

## NEW PRODUCTS

In addition to performance improvements, regulations and supply chain issues are increasingly becoming important factors regarding drivers for new product development. A tight supply on organotin intermediates in combination with increasing regulations on all organotins is creating a market demand for alternative products. Some of new product offerings include:

### Reaxis C114EXP and C1004EXP

- Inorganic tin products
- Increased biobased content
- Catalysts for polyurethane and silicone reactions

### Reaxis C1001

- Inorganic tin product
- High metal content
- Thermally stable
- Used in various applications where high metal content is required

### Reaxis C2307/C2308EXP

- Octyl-based organotins
- Non-silane/non-phthalate
- High flash point
- Catalysts for RTV and SMP silicones

### Reaxis C3211EXP and C739PEXP

- Bismuth-based products
- Water Tolerant
- Carboxylate-free
- Catalysts for polyurethanes

## RAW MATERIALS SUPPLY

We have seen that, in general, tin supplies have been tight with high demand. The London Metal Exchange has been trading tin at unprecedented highs. This is likely due to some restrictions on Indonesian exports. Because of additional constraints on shipping lanes and ongoing global conflicts, we expect tin prices to maintain their current values or near-current values throughout the year. Similar views can be held on other raw materials that Reaxis utilizes. There is a global increased demand for commodities and restrictions with availability and shipping. Reaxis Inc continues to leverage the mutually beneficial relationships with its suppliers and customers to keep a continuity to the supply chain in these flux periods.

## ENVIRONMENTAL, HEALTH AND SAFETY UPDATES

ISO 9001 is an international quality management system standard certification that helps to provide organizations with standards and guidelines that meet our customers' needs using statutory and regulatory requirements related to a product.

Reaxis is an ISO 9001:2015 certification that we have at both of our company sites. ISO 9001:2015 is a risk-based standard, that identifies risks and continuous improvements.

We are very proud of the accomplishments and employee participation at Reaxis Inc. enabling us the ability to achieve this prestigious certification. Reaxis takes pride in every aspect from consistently producing the product through to the packaging of the finished product.

The Reaxis McDonald site has been certified since 1997, while our other site UPARC on the outskirts of Pittsburgh, has just achieved its initial certification in 2018.

Reaxis is deeply invested in the ISO Quality program by having several lean six sigma black belts and with the anticipation soon of having a lean six sigma master black belt. This master black belt will have the ability to teach lean six sigma to the personnel at Reaxis.

For any questions about the certification, please reach out to Sandra Moore to learn more.

## WATER REUSE PROJECT

Approximately 3 years ago, we set out to create a solution to engineer and install a water reclamation system at the McDonald, PA location. Now, we save approximately 25,000 - 35,000 gallons of water per day!

## NEW EMPLOYEES FOR 2022

**Brian Johnston**  
SR QUALITY CONTROL CHEMIST

**Samuel Reno**  
PRODUCTION OPERATOR

**Sean Withers**  
PRODUCTION OPERATOR

**Robin Estok**  
SR R&D CHEMIST

**Garrett Grimm**  
R&D CHEMIST

## MARKETING

The resurgence of conferences and trade shows is a good sign that we are trending back to normal. Reaxis exhibited at the Specialty and Customs Chemicals show in Fort Worth, TX, and will be exhibiting at the Eurocoat Conference in Paris France (March 29-31, 2022) and the American Coatings Show (April 5-7, 2022) in Indianapolis, IN.
